

Results Driven, People Focused

# Millennium / MSi Solution

Shielding Operations against Cyber Attacks

**Millennium Corporation** is a strategic cybersecurity, system engineering, and program and project management services firm and committed partner to the Government - driven by results and focused on people as we help our customers achieve mission success. We have a proven record of performance – supported by successful contract results with a broad variety of customers within the ARMY, NAVY, OSD, DHS, and other civilian agencies. Millennium is the leading contractor providing threat cyberspace operations and offensive cyber capability development to DoD certified and accredited Red Teams.

**Mission Secure, Inc. (MSi)** is a cyber security company focused on protecting control systems that operate critical physical assets in defense and industry. The patented MSi Platform can be deployed bolt-on, value-added to provide superior OT cyber visibility and protection with comprehensive coverage in a single platform. The MSi Platform gives customers the ability to monitor, detect, inform, collect, correct and protect their critical control systems and related assets.

## One Solution

Together, Millennium Corporation and Mission Secure Inc. bring a new dimension of cybersecurity protections that integrates a unique and proven security solution for field, connected systems. Simply put - We defeat malware at the control devices!

## The Millennium / MSi Advantage

**Secure Architecture Review:** Millennium reviews your current security posture - both IT and OT, including the architectural design, validating agreement with standards, and assessing the ability to detect and respond.

**IT Risk Reduction:** Based on our Secure Architecture Review, Millennium mitigates identified vulnerabilities and improves your IT security posture. This prepares you for enhanced OT security provided by MSi's platform.

**OT Risk Reduction:** Millennium analyzes and mitigates vulnerabilities identified on OT systems. This phase includes the use of MSi's unique and innovative technologies to provide true cyber security to your Control Systems.

**Secure Architecture Validation:** Millennium then verifies the security implementation and validates that your environment is protected from current and emerging threats in the ICS landscape.

**Hunt Service:** In this ever-evolving domain, Millennium's Hunt Service will actively monitor and observe IT and OT network events and identify anomalies indicative of active compromise.

**Incident Response Service:** However unlikely, attacks can happen. We aren't arrogant enough to believe that you are ever 100% secure. Our tailored Incident Response service will provide rapid analysis and subsequent mitigation of IT and/or OT threats.

**Maintenance Support:** Nothing lasts forever, and environments change. We provide 24x7 monitoring and maintenance of all systems to ensure continuous protection.
